Vocal Stage

Find a song, review the retrieved lyrics and arrange them with chords. Prepare your vocal repertoire for PDF export and the stage screen.

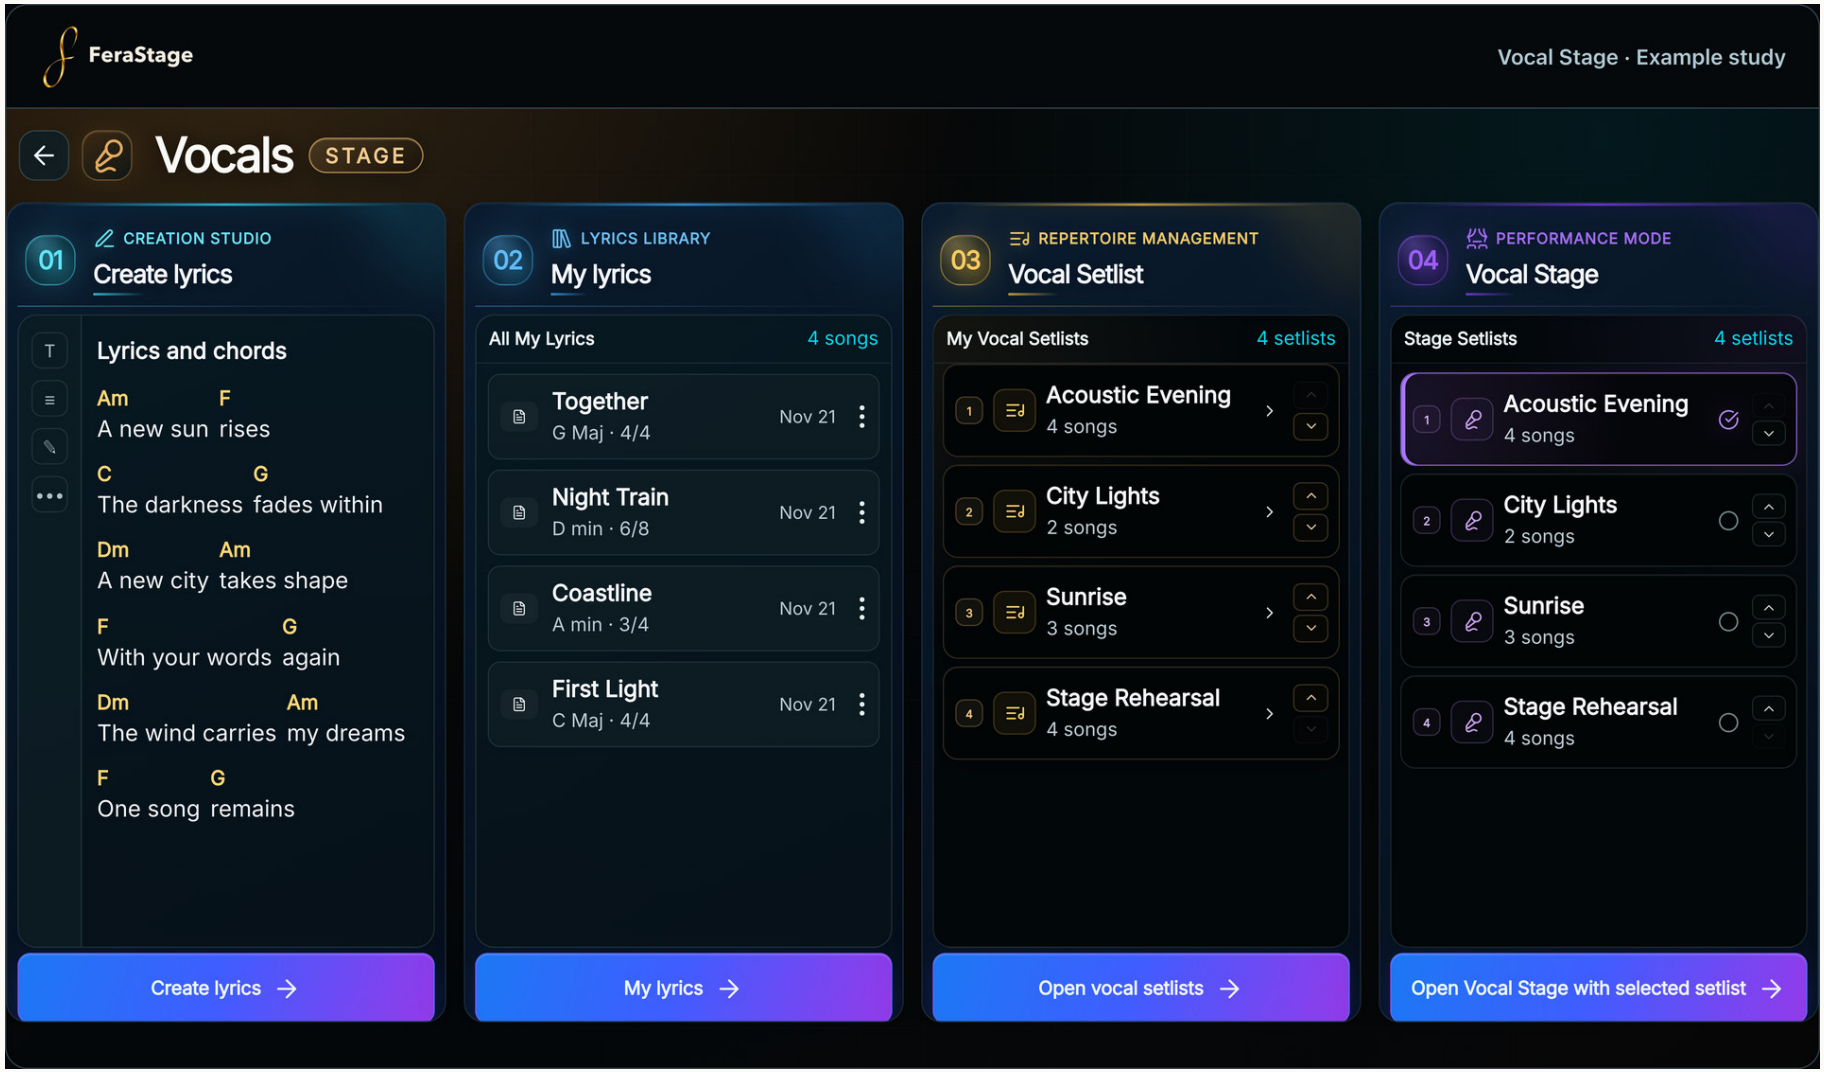
Get started in three steps

1. Open Create Lyrics → Add → Find Song and Add Chords. Enter the artist and song title, then choose Search Song.
2. Check the retrieved lyrics and details. Use Add Chords to find a matching arrangement, review the sections, then choose Confirm and Add to Page.
3. Save your work. Use PDF → Download PDF to export it, or add it to a Vocal Setlist and open it in Vocal Stage.

Usage notes

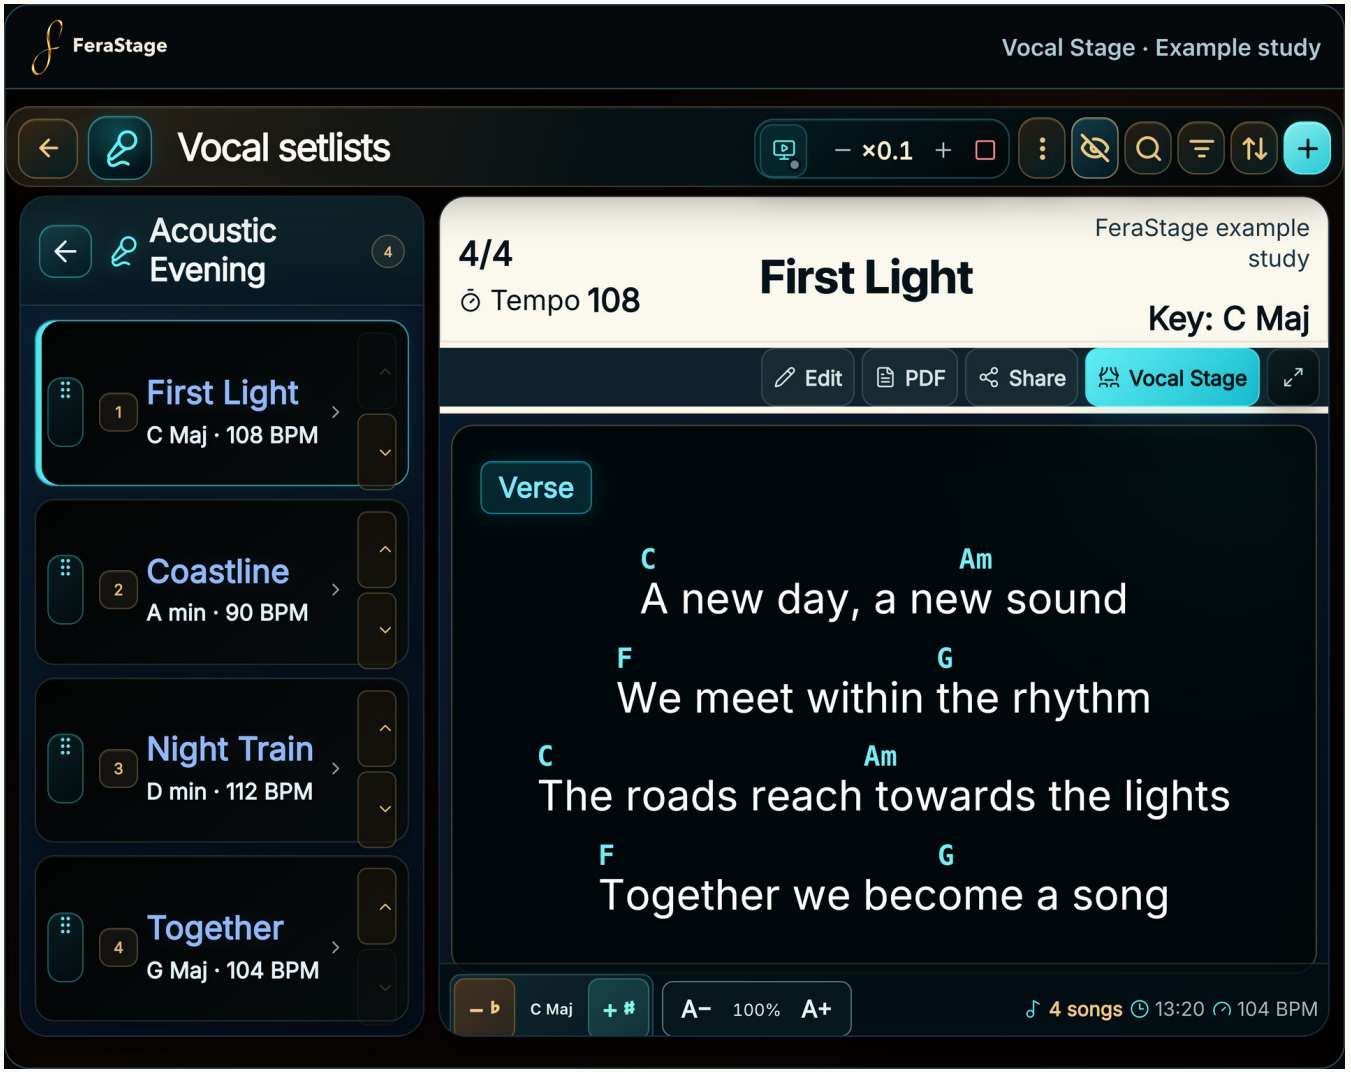
- Song search, lyric results and chord results depend on source coverage and connectivity. A result may not be available for every song.
- Check section suggestions, lyrics and chord placement before importing them. Incomplete arrangements may leave blank lines.
- Suggest Sections with AI and optional audio analysis are available when their integrations are enabled. Review the analysis results.
- Download the PDF after adding the lyrics to your work. A PDF and an editable FeraStage package are separate outputs.
- The prompter scrolls at your selected speed. Reference Keys produce sound and do not evaluate your singing.

Vocal Stage · Songs and setlists



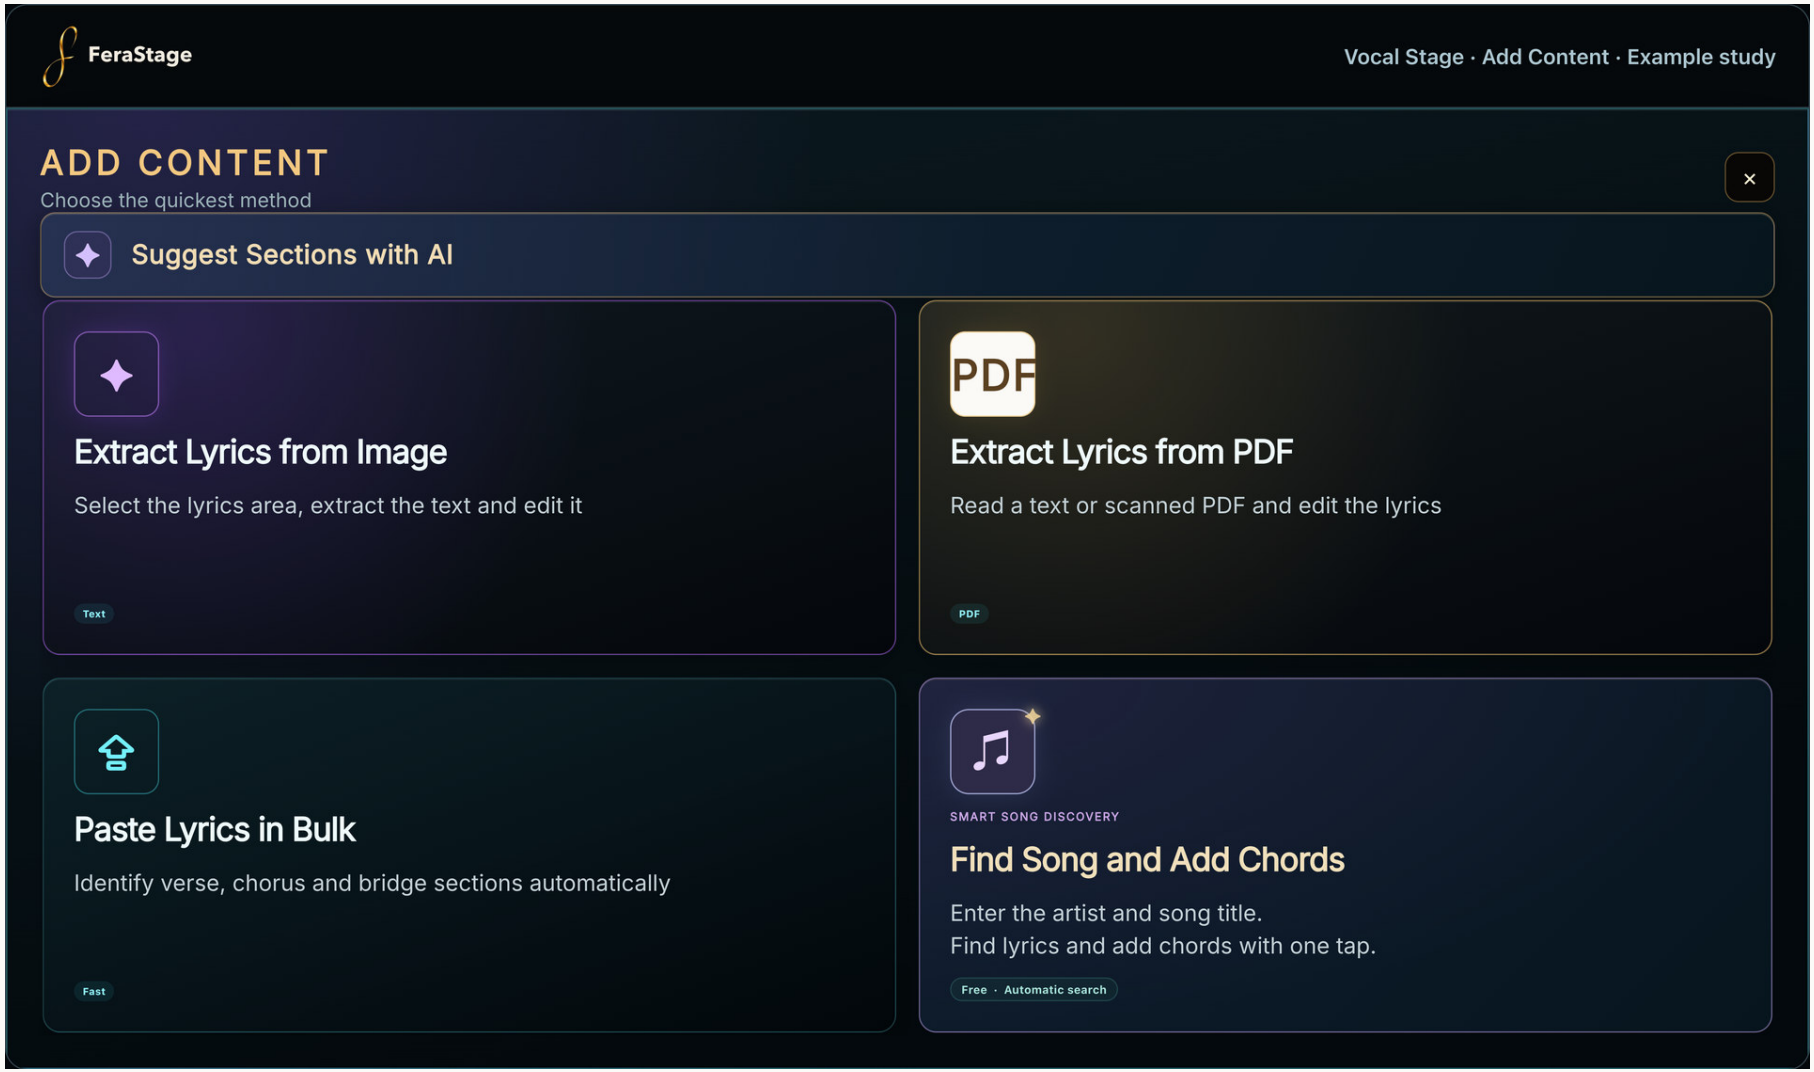
View three original songs with English titles and one with a Turkish title, alongside four sample setlists with large white titles.

Vocal Setlist · Acoustic Evening



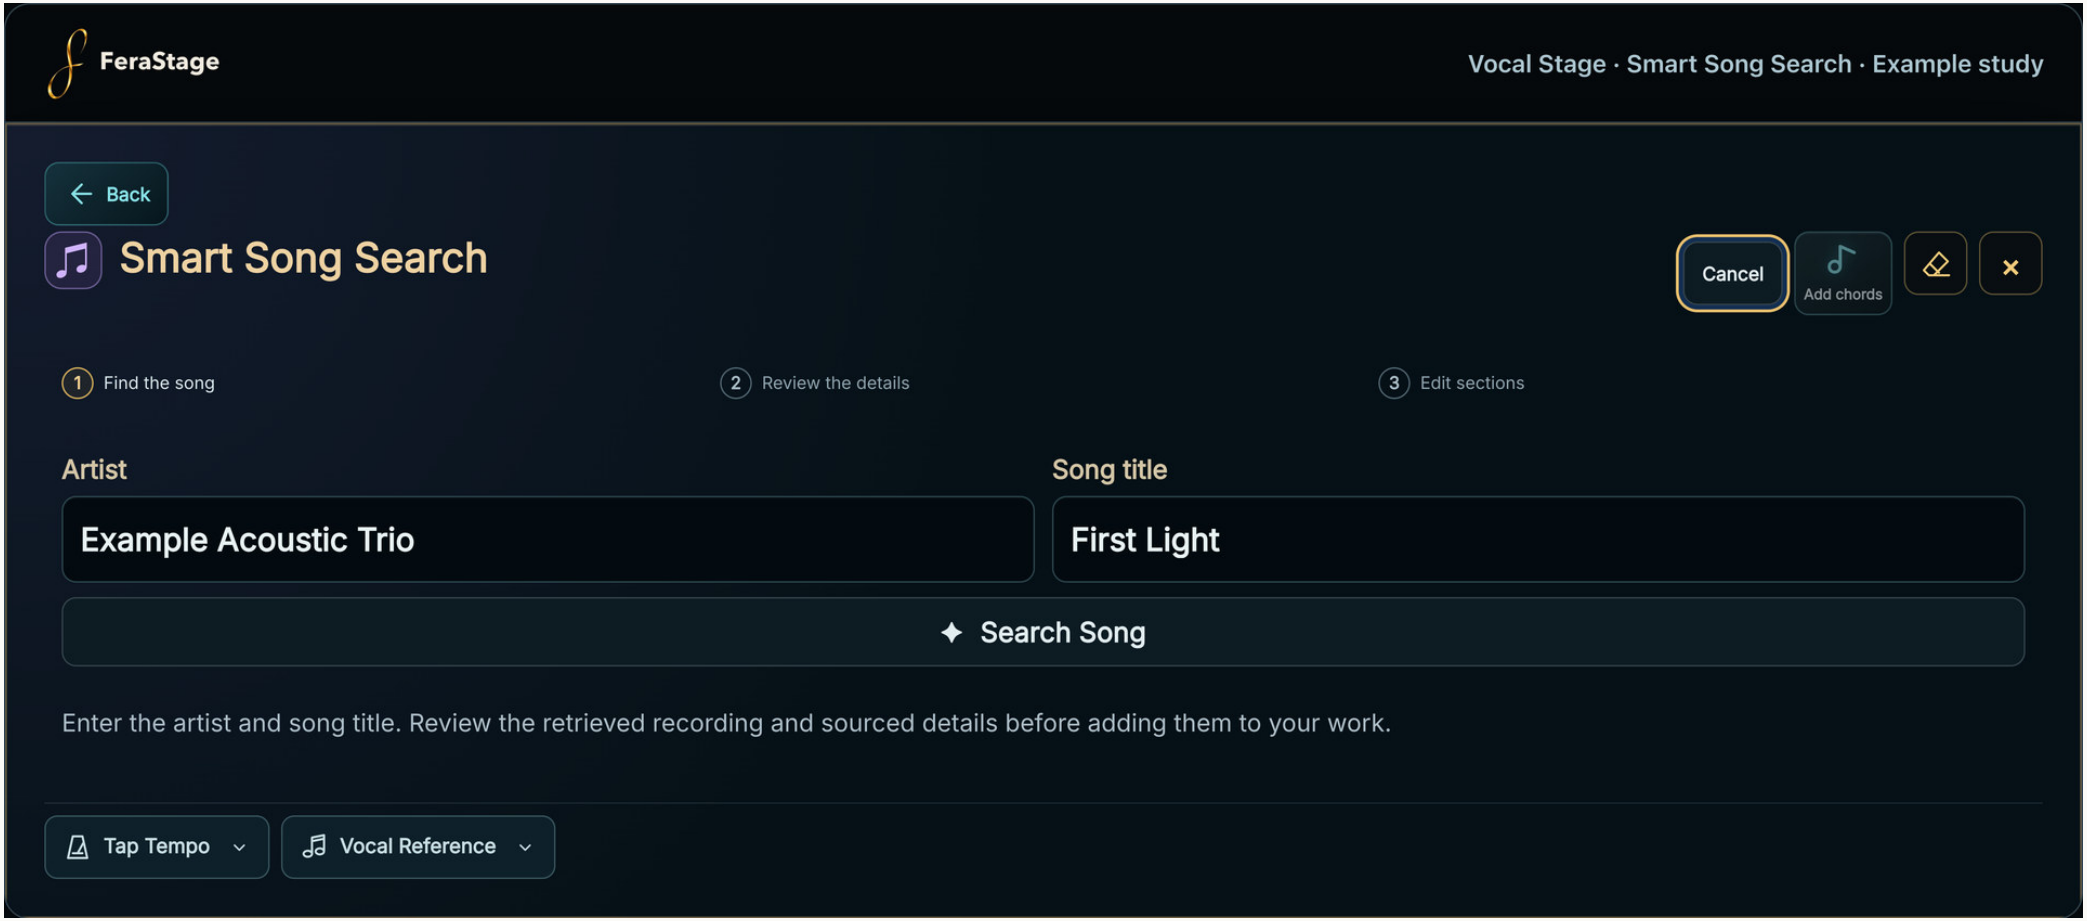
Read the First Light sample's title, time signature, tempo and key in a large, clear view.

Vocal Stage · Add Content



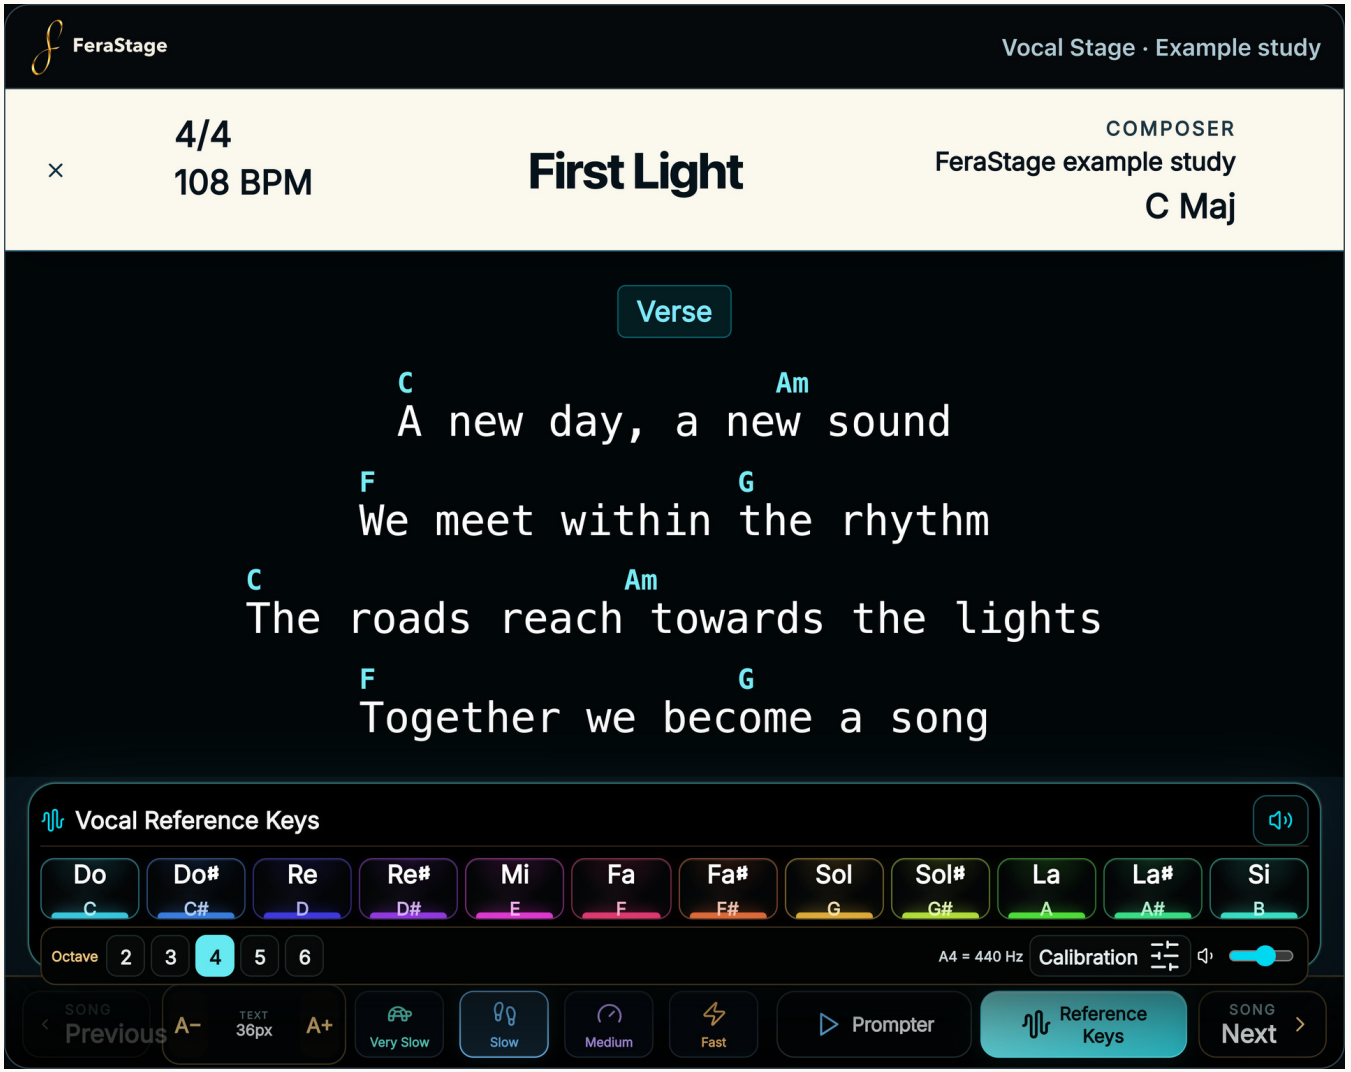
Explore Extract Lyrics from Image, Extract Lyrics from PDF, Paste Lyrics in Bulk and Find Song and Add Chords in the same panel.

Vocal Stage · Smart Song Search



View the artist and song title fields using FeraStage Acoustic Trio and First Light as examples. No actual search is submitted.

Vocal Stage · Reference Keys



Read the First Light sample’s title, time signature, tempo and key in a large, clear view.

Practice ideas

1. **Smart song discovery**

   In Find Song and Add Chords, enter the artist and song title. If several recordings are offered, choose the one you want.

2. **Add lyrics to your work**

   Check the retrieved lyrics, key, time signature, BPM and composer. Correct missing or incorrect details before adding them to your work.

3. **Add Chords**

   With the retrieved lyrics ready, choose Add Chords. Inspect the matching chord arrangement and any lines that remain incomplete.

4. **Use your own chord source**

   If no automatic match is found, paste your chorded text into Add Chord Source or Audio Recording, then choose Add Source Chords.

5. **Suggest Sections with AI**

   Request section suggestions for the lyrics you added. Review Verse, Chorus and other section labels, then confirm with Apply Suggestion.

Practice ideas

6. **Lyrics from an image or PDF**

   Use Extract Lyrics from Image or Extract Lyrics from PDF to import text from an existing document. Check and edit the recognized lines.

7. **Adapt to your vocal range**

   For a song with a valid key, use Transpose to move its chords down or up by a semitone. Adjust the chord display to your needs.

8. **Prepare a vocal setlist**

   Create a Vocal Setlist from My Lyrics. Drag songs into order and add duration, BPM and notes to prepare the running order.

9. **Rehearse on stage with the prompter**

   Choose the text size and scrolling speed in Vocal Stage. Use Reference Keys to hear the starting note as you move between songs.

10. **Download lyrics as a PDF**

    After adding the lyrics to your work, choose PDF → Download PDF. Share as Text and the editable FeraStage Lyrics Package are separate options.
