PRACTICE WORKSHEET 09 / 10

Custom string tuning

Save your own verified string targets.

> **PRACTICE EXAMPLE**
>
> Custom tuning name: Sample Three Strings
>
> Sample targets to enter: A2:0, D3:0, G3:0
>
> Check: verify targets against your instrument and reference

PRACTICE IN FERASTAGE

1. Open More or Custom Tuning.
2. Enter a tuning name and targets such as A2:0, D3:0 and G3:0.
3. Save the custom tuning and check it against your own reference.

WHAT TO LOOK FOR

The custom tuning name and three targets are saved. Check that the targets are suitable using your own reference.

YOUR PRACTICE NOTES

Target	Reference Hz*	Displayed Hz / cents	Direction / my note
A2	110.00		
D3	146.83		
G3	196.00		

* Sample equal-temperament targets for A4=440 Hz; these are not measurement results.

My check with my instrument and reference
