PRACTICE WORKSHEET 07 / 10

Adapt to your vocal range

For a song with a valid key, use Transpose to move its chords down or up by a semitone. Adjust the chord display to your needs.

> **PRACTICE EXAMPLE**
>
> Study: First Light | starting key: C major
>
> Sample progression: C - Am - F - G
>
> Try one semitone lower, then return to the starting key

PRACTICE IN FERASTAGE

1. Open First Light with a valid key assigned.
2. Use Transpose to lower it by a semitone and compare the chord spellings.
3. Try it in your vocal range. Return to the starting key if needed and note your final choice.

WHAT TO LOOK FOR

Editable chords move to your chosen key. Assess vocal comfort by trying it yourself.
